
RRI'S DOT HAZARDOUS WASTE TRANSPORT WORKSHOP

Syllabus — Course 202

Length: 0.5 days (immediately after Course 201)

Target: Initial training for persons responsible for, or involved in, the preparation of and actual operation of hazardous waste packaging and transportation. This includes, but is not limited to, waste handlers, technicians (operators, health physicists, analysts, etc.), QA/QC personnel, safety engineers, front-line management, and shippers. This workshop is also ideal for those who require retraining or those who wish to continue on in one of RRI's advanced shipper courses.

Prerequisite: RRI's DOT Hazardous Materials Transport Workshop (Course 201) is required immediately prior to this course.

Intensity: Mild Medium Challenging Extreme

Materials: RRI provides all training materials (the 49 CFR 100-185 has already been provided in Course 201). Testing and course completion certificate is also provided.

Objectives & Topics

Identify the hazardous waste transportation requirements as addressed in the DOT and RCRA waste regulations.

1. Recognize the distinction between Listed and Characteristic Waste.
2. Assign a waste code for a given waste.
3. Identify the interfaces between the DOT HMRs and RCRA regulations.
4. Apply the additional RCRA waste marking requirements.
5. Complete a Manifest description for a given waste.
6. State the labpack package exception requirements.
7. Identify the requirements for reuse of a DOT package for hazardous waste.
8. Identify who is responsible for notification and cleanup of releases of hazardous waste in transport.
